

General Design

FULL	General support for structural design	900 €	
	Automatic generation of load combinations, overturning check, solid mesher		450 €
	WoodCheck – timber checking		350 €
	Parametric analysis plugin		130 €
	SteelCheck – steel checking		350 €
	Generation of reports and Custom Report plugin		280 €

WoodCheck

	WoodCheck - checking of timber frames & CLT walls as per Eurocode 5	350 €	
--	--	-------	--

AluCheck

	Checking of aluminium alloy members as per Eurocode 9 (EN 1999-1-1) in general structures and also in scaffoldings/frameworks	580 €	
--	---	-------	--

Concrete

FULL	Checking of RC structures and Section Analyzer	780 €	
	Static & Seismic RC checks		390 €
	Section Analyzer		390 €

ImportExport

Max 2 format amongst	Importing and/or exporting models from/to different formats: Midas GEN e Civil, SAP2000, OpenSees, SeismoStruct, Sismicad, Nolian, CMP, CDM Dolmen, Straus7, ABAQUS and CalculiX, IDEA StatiCa Connection, CdsWin and others – Contact us for the different price options	880 €	
-----------------------------	---	-------	--

Section Analyzer

Cross-section calculator for all the types of sections, no matter their shape or their base material	390 €
--	-------

FireSafe

FULL Fire design as per Eurocodes	650 €	
FireSafe RC – for RC sections <i>requires Concrete – Static RC checks</i>		340 €
FireSafe Steel – for steel sections <i>requires General Design - SteelCheck</i>		340 €
FireSafe Alu – for aluminium alloy sections <i>requires AluCheck</i>		340 €

NonLinear

FULL Plastic hinges, non-linear spring elements Global and local verifications for RC and steel structures	950 €	
--	-------	--

ColdFormed

FULL Checks thin-walled and cold-formed sections as per EC3-1-3 for steel and as per EC9-1-4 for aluminium alloy <i>It extends features of Section Analyzer, of already owned or bought separately</i>	640 €	
--	-------	--

MasonryCheck

FULL Seismic analysis and checking of Masonry structures Non-linear analysis of Masonry structures	720 €	
--	-------	--

NeXel – plugin for Excel®

150€

For each of the listed packages, optionally:

Yearly email support 25% of actual cost of modules

Update to next version 20% of actual cost of modules

All prices are NOT including VAT, if applicable.

Special bundles

NextFEM Struct for PON CAD® **1576 €**
Automatic import, analysis and checking of scaffolding and frameworks designed with PON CAD – including 1 year of updates

Mail support - yearly		330 €
Update - yearly		348 €

WoodCheck for SAP2000® **720 €**
Checking of timber frame and CLT structures as per EC5 modelled in SAP2000® - including 6 months of updates

SteelCheck for Straus7® Checking of steel structures as per EC3 modelled in Straus7® - including 6 months of updates	550 €	
WoodCheck for Straus7® Checking of timber frame and CLT structures as per EC5 modelled in Straus7® - including 6 months of updates	700 €	
AluCheck for Straus7® Checking of aluminium alloy structures as per EC9 modelled in Straus7® - including 6 months of updates	800 €	
FireSafe for Straus7® Strength checking under fire conditions for 1 material (steel/ aluminium/RC) modelled in Straus7® - including 6 months of updates	950 €	

TT Foundations **720 €**
Automatic modelling and checking of RC foundations for models designed with TimberTech Buildings – including 6 months of updates

NextFEM Server **8200 €**
Intranet license of NextFEM Server – does not include Customization service – including 6 months of support and updates

NextFEM Server contact
Intranet/Internet license of NextFEM Server – optionally includes us
Customization service on request – including 6 months of support and updates
